A G2G3 PROJECT AND PORTFOLIO MANAGEMENT SIMULATION

PROPULSION

Propelling the enterprise to faster results

Creating energized and **successful project teams**

Creating contribution realization

Accelerating understanding of **PM best practice**

polestarTM PM

PROPULSION ▶ Propelling the enterprise to faster results

- ▶ Creating energized and successful project teams
- ▶ Accelerating understanding of Project & Portfolio Management best practice
- ▶ Creating contribution realization

WHO IS G2G3?
G2G3 is the leading provider of communication tools, gaming solutions and simulations that propel enterprise IT and business alignment.

THE CHALLENGES

- ▶ Reducing resistance to change
- ▶ Creating a shared understanding and commitment to project vision and goals
- ▶ Applying best practice methodologies such as PMBoK® and PRINCE2® to project delivery
- ▶ Achieving results whilst working within project constraints
- ▶ Defining and managing project scope
- ▶ Creating effective communication flows
- ▶ Creating happy and successful project teams

THE SOLUTION - POLESTAR PM (PROJECT MANAGEMENT)

This interactive simulation is a high-impact, energetic and fun way to accelerate understanding, involvement and acceptance of Project and Portfolio Management best practice in your organization.

Facilitated over one day in the fast world of global on-line retail, Polestar PM brings to life the project based behavioral and process issues faced by organizations. This is done through realistic scenarios to which participants can directly relate to and have actual experience of.

This unique experiential learning approach causes breakthrough understanding of Project and Portfolio Management best practice and transforms learning into an engaging, fun and highly memorable shared experience.

HOW IT WORKS

Normally delivered over 3 rounds, the Polestar PM simulation is designed to introduce key components through Management dynamics. Progressing through gaming dynamics, project delivery improves via the successful application of Project Management tools and techniques. This allows the group to deliver projects of increasing interdependency and complexity.

“Games can transform learning into a more engaging and dynamic process, enhancing people’s work performance and driving business results.”

Waldair Arevalo De Azevedo Filho, Gartner

The following aspects of PM are considered during each round:

ROUND 1

- Working in silos (Operations, Business, Project Office)
- Poor Project Initiation and Communication
- Poor Planning
- Poor Monitoring and Control - scope, schedule and cost
- Lack of Business Awareness

ROUND 2

- Working together
- Improved Initiation/Planning
- Improved Monitoring and Control
- Project Management tools - Gantt Chart, Work Breakdown Structures
- Planning Adaptive Action

ROUND 3

- Sharing the vision
- Project Management Tools - Critical Path Analysis, Arrow Diagramming Method, Precedence Diagramming Method
- Managing Risk
- Project Closing
- Project Success

THE RESULTS

The ability of Polestar PM to display real business performance improvement is a key deliverable. As participants progress through the rounds, they witness the actual impact of their actions on the fictional business they are supporting. The outcome - a holistic understanding that the main objective of Project and Portfolio Management is to ultimately improve business performance.
